

Kill Your Darlings: Curate Your Images

A record of the image-selection decisions made while building the portfolio — balancing authentic proof of work with a consistent AI-generated visual identity.

GENERAL AI FLUENCY | IMAGE CURATION REPORT

This document outlines the images selected for the portfolio. The goal was to use **real images** wherever authenticity and proof of work were important, while reserving **AI-generated visuals** for decorative elements only. All AI-generated images follow a consistent visual style to match the portfolio's identity.

1 Image Inventory

Portfolio Section	Image Used	Source	Reason
Hero	Blue Abstract Geometric Background	AI Generated	Decorative background that establishes the portfolio's modern blue-and-white visual identity.
About Me	My Profile Photo	Real	Represents me authentically.
Hero / Landing	Homepage Screenshot	Real	Shows the actual portfolio I built.
Projects	Projects Section Screenshot	Real	Demonstrates my real work and project presentation.
Skills	Blue Outline Icon Set	AI Generated	Decorative icons that match the portfolio's design language.
Contact	Contact Section Screenshot	Real	Shows the actual contact section of the portfolio.
Contact Decoration	Communication Illustration	AI Generated	Decorative visual supporting the contact section.

2 Real vs. AI Decisions

For this portfolio, real images were chosen whenever authenticity and proof of work were important. The portfolio screenshots and profile photo are real because they accurately represent the work built and who I am as a developer.

AI-generated images were used only for decorative elements, including the hero background, skills icon set, and contact illustration. These visuals enhance the overall design while keeping the focus on the real work.

3 Style Consistency

All AI-generated images were selected to maintain a single, consistent visual language throughout the portfolio. They share:

Blue & white color palette Minimal design Soft gradients Clean geometric shapes Thin outline icon style Modern technology aesthetic

4 Rejected Image

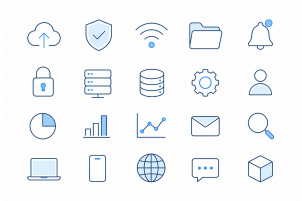

An alternative futuristic illustration with heavier 3D effects and brighter neon colors was generated. Although visually appealing, **it was rejected** because it distracted from the clean, minimal style of the portfolio and could shift attention away from the real work. The selected images better support the overall identity kit and maintain a consistent visual language.
